

Accessibility in Firefox

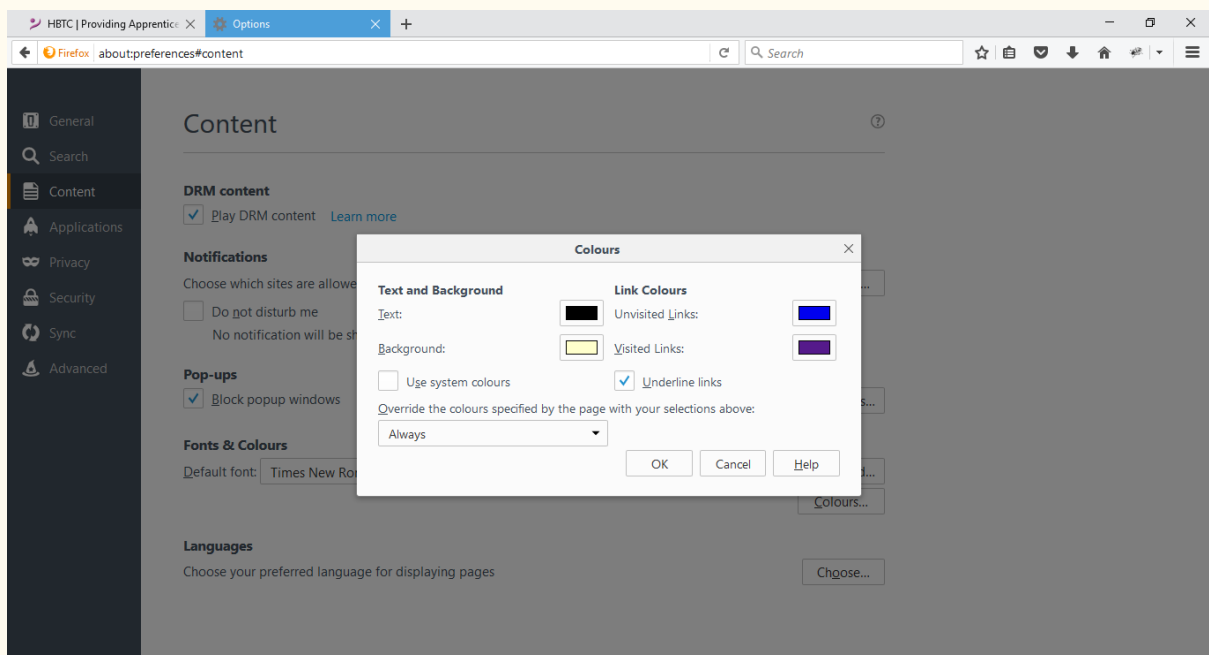

To change background colours/fonts click the menu button on Firefox and select “options”

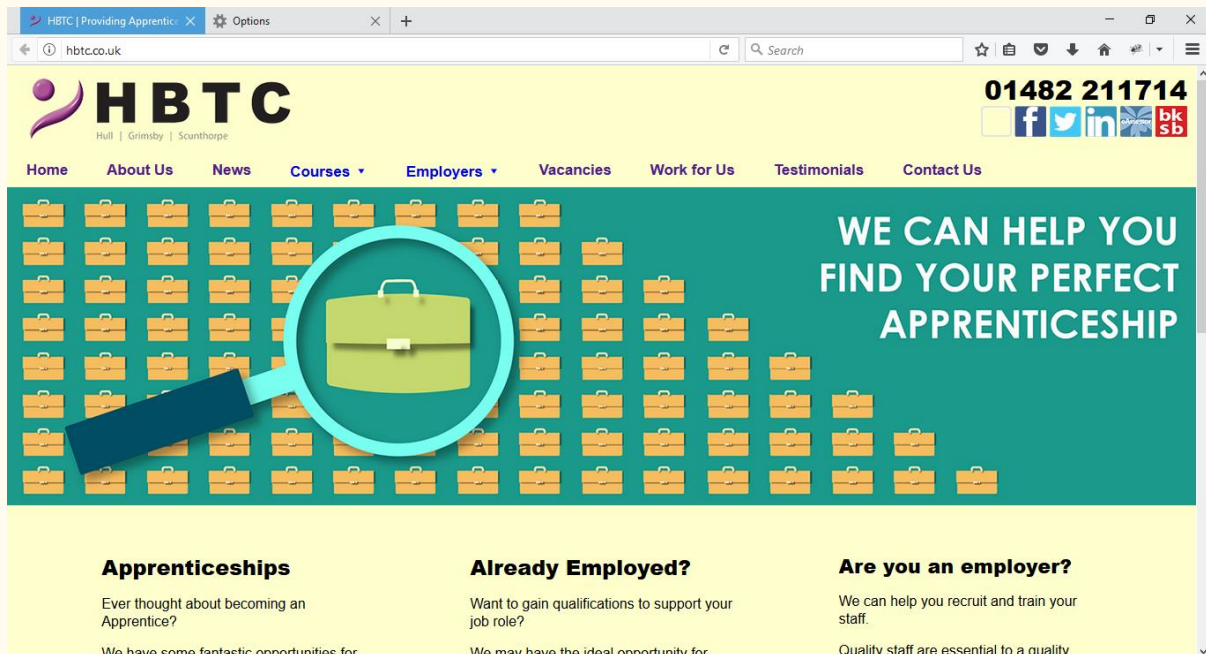

Select “content” from the left menu and then select “colours” in the “fonts & colours” section

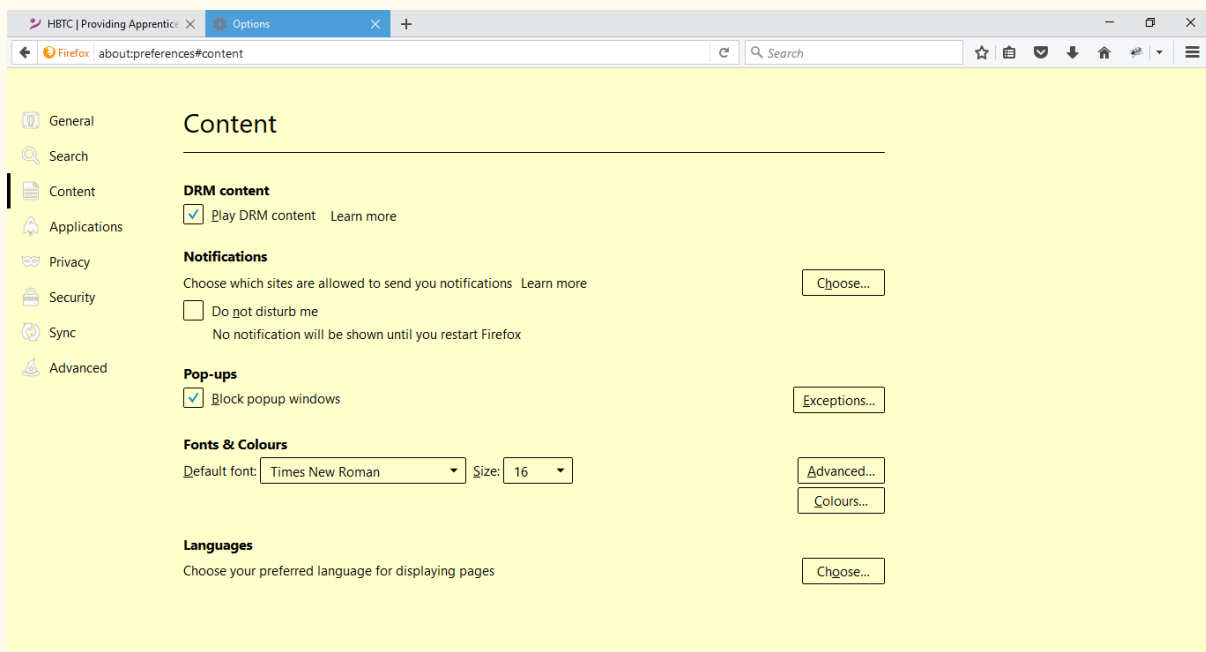

Select the colours you want from the colour pickers and select OK. Also ensure that the “override the colours specified by the page” is selected as “always”

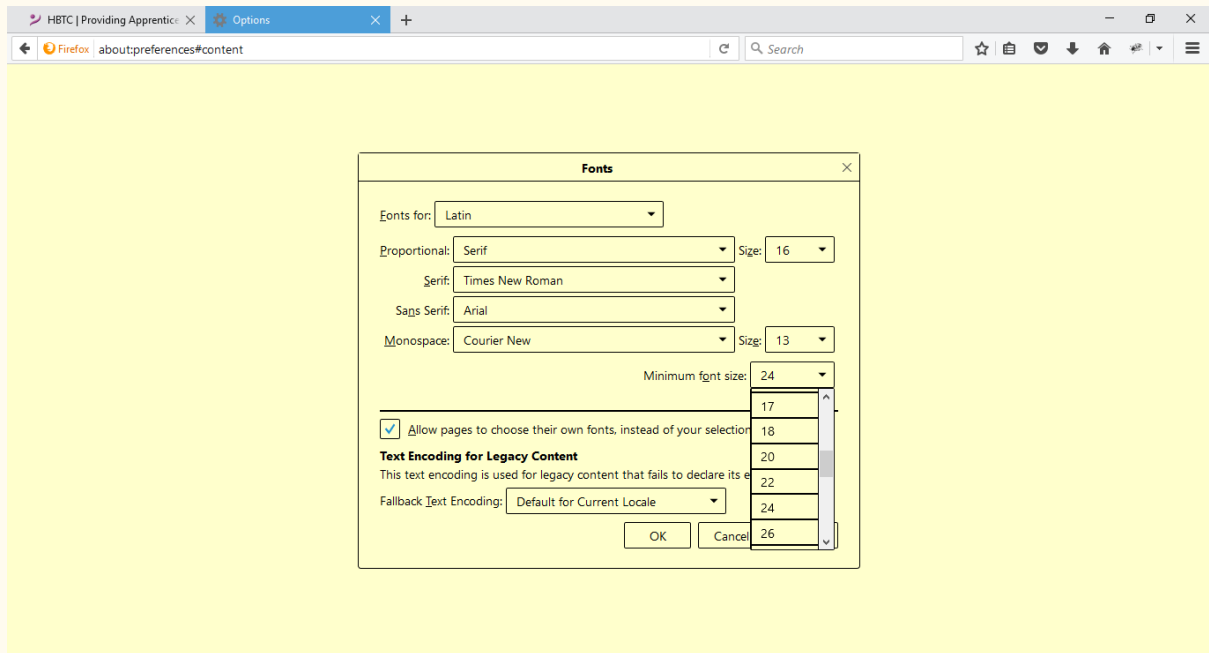

This will automatically change the background colour on all websites

To change the font size select “advanced” from the “fonts & colours” section

Here you can select the minimum font size. You also need to untick the box that says “allow websites to choose their own fonts”

This will automatically update all fonts in your browser
